ZERO-EMISSION SPACE AND WATER HEATING INCENTIVE PROGRAM

www.aqmd.gov

@SouthCoastAQMD

1. Funding is limited and submitting a rebate application does not guarantee you will receive a rebate. Rebates will be issued to eligible recipients on a first-come, first-served basis until funding is depleted. Consumers with South Coast AQMD qualified appliances installed on or after the start of the GO ZERO Incentive Program are eligible until rebate funds are exhausted or South Coast AQMD issues a public notice closing the rebate offer period.
 - a. Funding will be made available in phases.
 - b. The start and close of rebate offer period for each phase will be announced by South Coast AQMD notice(s).
 - c. Applications submitted after the end of a phase but prior to the start of the next phase will be denied.
 - d. Applications received prior to the close of rebate offer period, but which had no rebate issued due to a limitation of funding, may have priority consideration by conducting earlier evaluation for a rebate in the next phase, if the installation qualifies for a rebate in the next phase.
 - e. If program funding has been completely exhausted or the program offering period has concluded, all non-funded applications may be denied.
2. Rebate amounts are subject to change and will be posted on the website.
3. Rebate issued to each applicant, in combination with other incentives approved for the installation, shall not exceed the total project cost. The South Coast AQMD reserves the right to adjust the rebate for an application for this purpose.
4. All rebated appliances are subject to an on-site inspection at the discretion of South Coast AQMD.
5. South Coast AQMD is not responsible for any taxes, fees, or tariffs that may be imposed as a result of purchase and installation of appliances.
6. South Coast AQMD makes no representations or warranties relating to the appliances subject to this program, including but not limited to any hazardous substances that may be contained in the appliance, the quality of the appliance, or the longevity of the appliance.
7. Applicant waives and releases the South Coast AQMD and its contractors or agents from any and all claims and causes of action arising out of the installation and use of appliances pursuant to the GO ZERO Incentive Program.
8. If installation cannot be verified, the applicant must reimburse the GO ZERO Incentive Program for rebates received and any associated processing costs.
9. In order to be eligible for a rebate, type of appliance must be included in the Qualified Product List. Please check the Qualified Product List on the website for details.
10. The GO ZERO Single Family Program is reserved for buildings defined as a single family residence.
11. The GO ZERO Single Family Program is reserved for existing buildings; no new construction buildings will be eligible for the program.
12. Applicants must have a qualified appliance installed before submitting the rebate application. Applicants are only eligible for rebates for appliances installed at locations of which they are the owner or resident or the installer designated by the owner or resident for submitting applications and receiving rebates. One rebate per heat pump HVAC can be issued per single family dwelling, and one rebate for heat pump water heating can be issued per single family dwelling.
13. Customers will need to select the method of rebate payment after rebate approval. Rebate checks will become void 90 days after the date they are issued. If a customer selects a pre-paid physical or digital gift card those funds will expire 6 months after issuance.
14. Rebate applications must be complete and are subject to verification and review for accuracy, including all necessary documentation. The supporting invoice must include, at minimum, the model number, serial number, the installation date, equipment cost, installation cost, and required electrical upgrade cost for the qualifying appliance. Further documentation may be requested.
15. Applicants eligible for the additional incentive available to overburdened communities must live in a community designated by State of California SB 535 as a Disadvantaged Community. The State of California has provided a map of these communities and this map can be found at <https://oehha.ca.gov/calenviroscreen/sb535>.
